BRIEF OUTLINE OF PLOT (Information in brackets NOT FOR PUBLICATION)

A group of palaeontologists led by PROFESSOR KYLE, have been savagely attacked while studying fossil remains deep in a newly discovered cave system. KYLE, the only survivor of the party has managed to summon help in the shape of LIEUTENANT SCOTT and his troopers.

Meanwhile, on board the Tardis, ADRIC has declared the desire to return home. As this would mean returning to E-space, the DOCTOR is reluctant, but ADRIC is adamant, saying he will plot a course. While ADRIC does this, the DOCTOR materialises the Tardis underground on 25th century Earth. Exploring the caves, the DOCTOR finds impressive fossilised dinosaur remains. He tells the companions that the dinosaur had literally died out overnight, their demise probably caused by Earth's collision with an enormous object from space. The impact had caused massive amounts of dust to be hurled up into the atmosphere, blocking out the sun and causing the surface temperature of the planet to rapidly drop. The reptile dinosaurs couldn't cope.

The journey underground has proved difficult for KYLE and the troopers, several of their number having been killed by an unseen force. When they reach the main cavern, the place of the palaeontologist's massacre, they find the DOCTOR and COMPANIONS. SCOTT assumes them responsible, but during his questioning, they are attacked by two androids, (controlled from their base by CYBERMEN.)

The androids are eventually destroyed, but not before a signal they are transmitting to their base is traced by the DOCTOR. The DOCTOR also discovers a metal hatch built into the wall of the cave. When opened, it is found to contain a massive bomb which the DOCTOR deactivates.

SCOTT and KYLE join the DOCTOR in their journey to the source of the transmission. The Tardis materialises on board a massive Earth bound freighter. The DOCTOR and ADRIC are soon captured and questioned by BRIGGS, BERGER and RINGWAY concerning the disappearance and murder of several of their crew.

(With the DOCTOR a prisoner, the CYBERMEN decide to secure the freighter for themselves. From their base deep in the hold, the CYBERMEN emerge and soon the ship is theirs. The DOCTOR learns that as he has deactivated their bomb, the freighter is to be used as a massive missile.

He also learns from the CYBERLEADER that an interplanetary conference is being held on Earth where a pact will be signed uniting their forces against the CYBERMEN. CYBERLEADER cannot allow this to happen. The conference must be destroyed.

The freighter is locked into a course for Earth and the DOCTOR forced to take CYBERLEADER on board the Tardis. ADRIC is left with the crew and after overpowering their guards, they struggle to divert the collision. But such is the nature of the Cyber device controlling the freighter, ADRIC only succeeds in forcing the ship into a reverse warp, sending it backwards in time, but still heading for Earth.

Unable to do any more, BRIGGS and crew abandon ship, but ADRIC stays on board believing he can still change the freighter's course. But he is too late. The ship, with ADRIC on board, crashes into Earth. The DOCTOR and COMPANIONS watch from the Tardis. TEGAN is distraught, not only because of ADRIC's death, but because of the effect it will have on her own history. The DOCTOR points out that they have travelled back to the time when the dinosaurs died out - the freighter was the object that collided with Earth. What will follow is the history of Earth as Tegan knows it. Earth is safe. The CYBERMEN on board the Tardis are overwhelmed, but that hardly compensates for the death of ADRIC.)

Track L. and Pan L.
to hold Doc/Adric's
move to console

(THE DOCTOR CROSSES
TO THE COMPUTER AND
TAPS SOME INFORMATION
INTO IT)

Well
ADRIC: / look tell me quickly.

(THE ANSWER COMES
UP ON THE DISPLAY
SCREEN)

THE DOCTOR: All right. But first
tell me what the square root of
3.69873 is

136. 2 A (+ Anchor)

ADRIC: (PAUSES FOR A MOMENT)
About 1.92321.

137. 5 A
3-S Doc/Berger/
Adric

BERGER: (IMPRESSED BY ADRIC'S
SPEED) That not possible.

Oh
THE DOCTOR: / He's very good. And
almost right.

(run on next)

(shot 137 on 5)

Track with
them U/S

ADRIC: Will you just try and
explain what you're doing.

(THE DOCTOR CROSSES
TO THE STABILIZING
MACHINE)

THE DOCTOR: Anti-matter powers the ship.
For the anti-matter to remain safe, it has to be
contained in a vessel with a
totally stable molecular structure.
Otherwise it would/blow to bits.
well

But

ADRIC:/ No such material exists.

THE DOCTOR: Absolutely right.
Although with computer controlled
electronics it is possible to
simulate it.

(PATS STABILIZING
MACHINE)

Hold their
move f'ward

ADRIC: But you're saying that
ADRIC: that machine constantly adjusts
and re-adjusts the molecular structure
of the anti-matter vessel?

THE DOCTOR: Right. However destruc-
tive the anti-matter is, the vessel
is always stable.

ADRIC: That's very clever.

Oh

THE DOCTOR: /It is.

BERGER: But will the device work
to stabilize the shield?

Well

THE DOCTOR: /It if doesn't,
we're dead.
